

A SOURCE RECORDS

ClinicalTrials.gov 94 unique trials investigation activity	PubMed / PMC 3,391 records published evidence	FAERS $\gamma = 0.75$ reported safety signals	MeSH controlled concepts identity harmonisation
--	---	--	---

B QUALITY GATES

1	IDENTITY	Hydroxychloroquine → D006886 canonical drug	COVID-19 → D000086382 canonical disease	Pair HCQ × COVID-19 retained canonical pair	
2	RELEVANCE	Retrieved 3,391 records	Exact pair 3,108 retained	Excluded 283 pair verification	
3	EVIDENCE TYPE	Therapeutic 893 28.7%	Adverse / conflicting 1,271 40.9%	Irrelevant 944 30.4%	
4	SOURCE PURPOSE	Registry activity trial footprint	Literature direction published evidence	Network 29,273 edges 2,267 paths	FAERS safety reported harms
5	SAFETY INTERPRETATION	Overlap 8 terms overlapping safety terms		γ 0.75 separate from efficacy	
6	INFERENCE	Graph layer 0.9999999998 structural score		Clinical-evidence layer 0.202 95% CrI 0.155–0.254	
7	DECISION USE	Evidence readiness 74.872/100 coverage and auditability		Final flag Safety-conflicted manual interpretation required	

C INTERPRETATION CONSTRAINT

Readiness summarises coverage, consistency and traceability.
It is not a probability of efficacy.
